

FuturZement C.1 | FuturBeton C.1

nanostructured cement/concrete

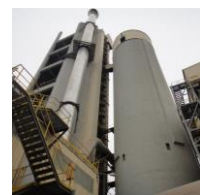

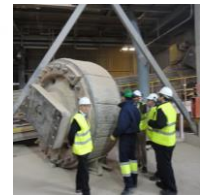

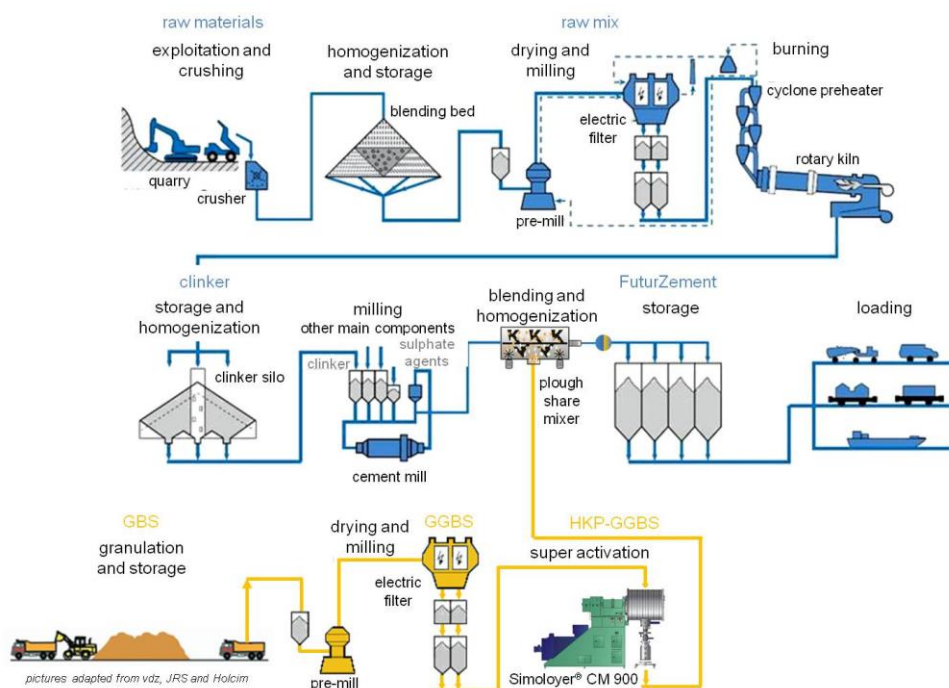

high strength ☀ CO₂-low ☀ super durability

- from slag to high performance concrete -

FuturZement - industrial large scale processing -

- drying & pre-milling of slag (GBS) to Ground Granulated Blastfurnace Slag (GGBS)
- super-activation of GGBS to HKP-GGBS by Simoloyer®
- mixing FuturZement from OPC (conventional) and HKP-GGBS

-large scale processing of FuturZement, schematic above and flowchart below-
