

# Carrier-gas-discharging-unit TGD100 for Simoloyer® CM100

## in general, mission & challenge

TGD carrier-gas-discharging-unit allows to transport and insitu separate/classify multiphase flows in dry powder processing under controlled condition under inert gas after preceding evacuation. Carrier-gas-assisted-discharging is designed to support critical discharging/unloading process particularly after HKP (MA, HEM, RM) in the Simoloyer® after batch-operation mode. In 2006, TGD represented the first commercialized component group for auto-batch and semi-continuous HKP-operation at that time with conventional SKV-turbines. Later, Zoz-turbines SKZ improved evacuation substantially. In result, TGD can increase powder yield and product quality substantially, since the severe change of B/P-weight-ratio during discharging is effectively addressed.

## advanced

Carrier-gas assisted discharging for Simoloyer® with standard grinding units (non-continuously), here CM100

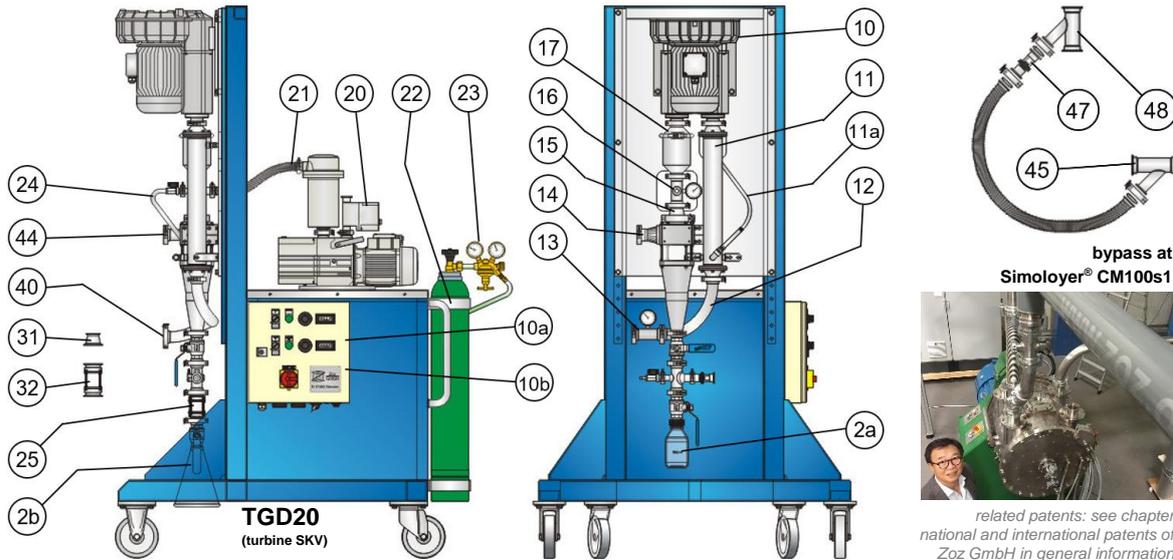

- higher powder yield in shorter time at lower rotational speed;
- less kinetic impact at discharging (lower speed, shorter time);
- semi-automatic process:
- controlled carrier gas flow in closed or open system;
- pressure-measurement and gas-cooling on a mobile unit;
- carrier gas fully recycled, inert atmosphere;
- standard air-lock DN63 can be adapted (with glass-container).

## options

- standard air-lock DN63/container adapted with option 25 (> page 02);
- air-lock DN63 adapted with opt. 30-31 (+32 for valve container);
- bypass (45-49) for different gas flow in grinding unit and cyclone;
- extended Simoloyer® cooling block for heat exchanger;
- rotary vane feeder extension for electrical control (10b);
- vacuum supply (preceding evacuation) upon unit-plateau (20-21);
- gas supply for inert gas fixed at cart-rear (22-23);
- communication of gas-drive by MALTOZ®-software.

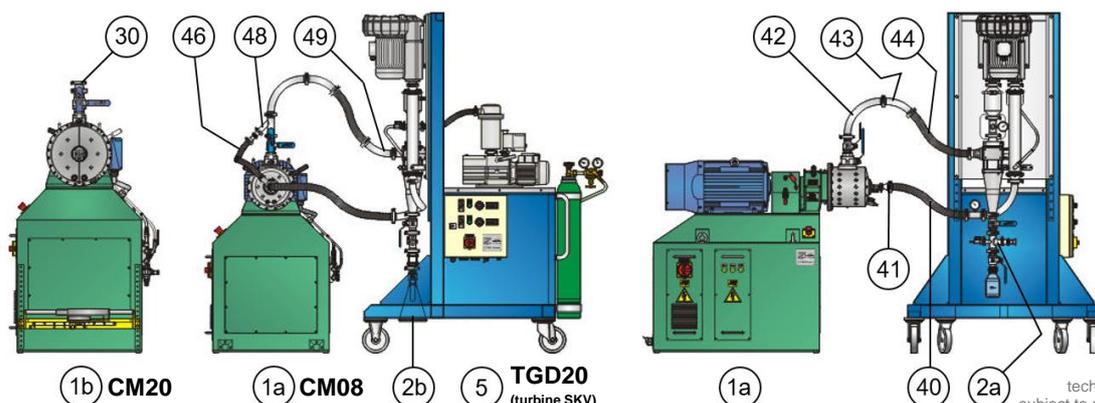

## dimension

L x B x H [mm]	1500 x 1500 x 3000
net weight (mobile unit only)	200 kg
net weight (incl. components, standard)	300 kg
nominal power (total)	6 kW
power supply	400V, 3 phase, 16A

related patents: see chapter national and international patents of Zoz GmbH in general information
