

# Transparent Pipe Module GR

## - watch flowing solids -

### application

GR transparent pipe modules allow the observation of (multiphase-)flows particularly the transfer of powder material and granules in aerodynamic systems at continuous / semi-continuous processing. Modules are equipped with standard-KF-ports and can be evacuated. Transparent tubes are restorable and at extended length, modules may be utilized as buffer-containers in air-lock systems.

### technical data, dimensions

| unit size, DN              | GR-DN16   | GR-DN25 | GR-DN40 | GR-DN50 | GR-DN63 | GR-DN100 |
|----------------------------|---|---------|---------|---------|---------|----------|
| standard length A1 [mm]    | 75  | 75      | 100     | 125     | 150     | 200      |
| extended length A2 [mm]    | 150   | 150     | 200     | 250     | 300     | 300      |
| block-length B [mm]        | 37  | 48      | 62      | 70      | 82      | 130      |
| glass-tube [mm]            | 20x2  | 30x3    | 50x5    | 60x5    | 70x4    | 110x5    |
| weight standard [kg]       | 0.2   | 0.4     | 0.9     | 1.8     | 3.4     | 6.2      |
| operation pressure & temp. | 1 bar max., 50 °C max.                                  |         |         |         |         |          |
| ports & material           | standard-KF, stainless steel 1.4301/acrylic glass/glass |         |         |         |         |          |
| seals                      | NBR/PTFE  |         |         |         |         |          |
